Wiseco's new Electronic Fuel Injection Controllers are simple and easy to use. With the push of a button, you can easily adjust fuel flow for modifications such as high-compression pistons, cams, intake and exhaust, to fine tune your bike. No dyno or computer needed! It gives you three basic zones of operation, similar to a carburetor. One zone sets your 'pilot jet' for idle and cruise. Another zone sets your 'needle jet' for acceleration, and a third zone sets your 'main jet' for heavy loading and wide open throttle.

This cost-effective EFI controller is complete with built-in accelerator pump tuning capability. Available only through Wiseco, these units will complete your 'One Name. One Solution.™'
