Wiseco Chevy LS Series Piston Kits

Automotive

Wiseco has again taken Chevy LS forged piston technology another step further! Wiseco's multifit pockets are designed to accommodate OE and aftermarket versions of the LS1, LS2, LS3, LS6, LS92, and LS7 heads. To increase horsepower over ordinary flat top pistons, Wiseco's Flow-Dome technology increases flow around the valve at tdc. The pistons are designed around the 1.2mm, 1.2mm, 3mm Nitride steel top and Napier second ring to ensure quick break-in, long life, and low friction for increased horsepower. As always, the ultra strong 2618 alloy is used for these forgings. Permanent skirt coatings are standard and reduce noise versus uncoated skirts. In addition, offset wristpins reduce noise when compared to typical forged pistons.

Price (US): Kit: \$784.13

Kit Part #	Cubic Inch	Repl. Piston	Bore Size	Stroke	Rod Lgth.	Comp. Ht.	Dome Volume	Comp. Ratio	Repl. Ring Part #
