Wiseco Fuel Management Controllers- ATV & UTV

ATV/ UTV

Wiseco's new Electronic Fuel Injection Controllers are simple and easy to use. With the push of a button, you can easily adjust fuel flow for modifications such as high compression pistons, cams, intake, and exhaust to fine tune your bike. There is no dyno or computer needed! It gives you three basic zones of operation, similar to a carburetor. One zone sets your 'pilot jet' for idle and cruise. Another zone sets your 'needle jet' for acceleration, and a third zone sets your 'main jet' for heavy loading and wide open throttle.

Available through Wiseco, these units will complete your 'One Name. One Solution.™'
