## NEW Wiseco Fuel Management Controllers- On-Road

### Motorcycle

Wiseco's new Electronic Fuel Injection Controllers are simple and easy to use. With the push of a button, you can easily adjust fuel flow for modifications such as high compression pistons, cams, intake, and exhaust to fine tune your bike. No dyno or computer needed! It gives you three basic zones of operation, similar to a carburetor. One zone sets your 'pilot jet' for idle and cruise. Another zone sets your 'needle jet' for acceleration, and a third zone sets your 'main jet' for heavy loading and wide open throttle.

This cost-effective fuel management controller is complete with built-in accelerator pump tuning capability. Available through Wiseco, these units will complete your 'One Name. One Solution.™'

Make	Model	Year Range	Wiseco Part Number
Honda	CBR1000RR	2004-07	FMC069
Honda	CBR1000RR	2008-09	FMC070

### Features

- Plug N' Play installation
- Easy push button operation
- Easy air/fuel ratio adjustment
- Load based operation
- 3 basic zones of operation
- Uses OEM base code
- Electronic 'accelerator pump' tuning capability

### Benefits

- Simple to use and understand
- No computer or dyno required
- Easily adjusts for modifications - intake, exhaust, cams, etc.
- Tuning capabilities superior to Alpha N type controllers
- Similar to carburetors
- Does not scramble base code
- Provides instantaneous throttle response
