Cutting Edge Piston Ring Technology for V-Twin Applications

V-Twin

The Newest, Leading Edge piston ring technology for V-Twin applications is here! Paired with Wiseco's high performance forged pistons, our new VM Series piston rings for V-Twin applications bring you the power and technology you want. Now our Twin Cam 88 and 96 kits come standard with VM rings.

Features

- Nitrided stainless steel top ring material
- Positive twist top ring
- Napier scraper ring
- 2.0mm oil ring
- High conformability
- Reduced friction loading
- Excellent bore surface compatibility

Benefits

- Extreme high temperature strength
- Excellent sealing and blow-by control
- Superior oil control
- Reduced friction, excellent oil control
- Excellent sealing and oil control
- Reduced wear and improved performance
- Compatible with cast iron, ductile iron, and Nikasil
