Wiseco Forged Clutch baskets, inner hubs, and pressure plates

- Now with a **LIFETIME GUARANTEE** against notching or breaking!
- Wiseco forged clutch components have greater strength due to “feature aligned grain flow.” Compared to castings or products machined from billet, Wiseco forged clutch components are lighter and still have increased mechanical properties resulting in higher strength, ductility, and resistance to impact and fatigue.
- Hard anodized and Teflon coated for a long life of smooth clutch operation through the elimination of wear on contact surfaces. We **GUARANTEE** it!
- Specifically designed to capitalize on detailed features that can only be produced by the precision forging process.

Clutch friction plates and drive plates

- Friction plates are manufactured to exact OEM specifications.
- Steel Drive Plates offer longevity, durability, and the feel of OEM plates.
- Alloy Drive Plates feature improved engine performance resulting from less rotational mass and quicker lock-up than conventional steel drive plates.

Wiseco Clutch Kits

- Clutch pack kit: Includes fibers, steels, and springs (10% stiffer than stock).
- Performance clutch kit: Includes fibers, steels, springs, clutch basket, and rubber cushions.
- Extreme clutch kit: Included fibers, steels, springs, clutch basket, inner hub, pressure plate, and rubber cushions.
