Wiseco Complete Bottom End Kit for KTM 125SX 2001-10

Motorcycle

Let Wiseco help refresh the bottom end of your KTM 125 SX with a complete crankshaft kit. Our complete bottom end rebuild kits come complete with crankshaft assembly, main bearings, seals, and complete bottom end gasket kit to get the job done. Order one part number and you've got everything you need for your rebuild.

Wiseco's crankshafts have been engineered and rigorously tested to ensure each part exceeds the highest quality standards.

Crankshafts

- Double forged rods maintain superior dimensional consistency through optimized grain flow.
- Shot peened rods increase durability and reduce residual stress.
- Precision engineered oiling slots maximize rod strength and bearing life.
- Double drilled rod eyes increase pin oiling and reduce galling.
- Coated bronze thrust washers, with a dimpled design, to increase oil retention and reduce friction.
- Case hardened crank pin bearings are made from high quality hot-rolled steel.

Gaskets

- Wiseco complete gasket kits are made from premium materials for maximum sealing and reliability.

Bearings

- All bearings are OEM quality for reliability and performance.

Pricing (US): WPC153 \$216.96, WPR206 \$91.91
