

# New Product

## Wiseco Volkswagon Type 1 Flat Top Piston Kit

Automotive

This is the same basic design as our popular K001ESV piston, but with a new ring pack.

- |                                                                                                                                                                                                                                                                                                           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

All Wiseco Sport Compact kits come with 1mm x 1.2mm x 2.8mm XX ring sets. These rings have a stainless steel gas nitride top ring, cast iron Napier hook second ring, and flex-vent oil ring with gas nitride scraper rails.

The piston pins and corresponding clips are also included. All pistons have skirt coating for improved wear and friction reduction.

Prices (US): Kit \$517.42      Repl. Piston \$142.30
