Wiseco Universal Fuel Management Controller Mounts

Motorcycle

Wiseco is proud to offer a brand new **universal mount** for all Wiseco Fuel Management Controller units. The mounts are designed to allow users to easily secure their controller by attaching the mount through an existing bolt or by using Velcro or zip ties. Once the mount is attached to the vehicle, the controller can be easily and safely secured in the universal mount, while still accessing the control buttons on the front of the controller. Wiseco's mounts are made of a high strength Nylon polymer, making them weather and impact resistant to stand up to severe riding conditions.

Mounts are available in Black, Red, Orange, Yellow, Green, or Blue.

Price (US) Retail: \$19.95
