

HONDA ATC 200

TWO HIGH PERFORMANCE PISTONS HAVE BEEN DESIGNED BY WISECO FOR THIS HONDA APPLICATION:

The 4289 Series has been designed for racing applications and requires the use of racing gasoline of 102 octane or better. Use of low octane pump gas with the 4289 series will cause denotation and severe piston and engine damage. The 4156 series piston at 10.25:1 compression has been designed for fuel having minimum octane rating of 92 {(R=M) / 2 method}.

**If you have any questions regarding these applications,
please contact Wiseco's technical service department at: (440) 951-6600.**
